Based on an inspection this day, the items circled above identify the violations in operations or facility which must be corrected by the next routine inspection or such shorter period of time as may be specified in writing by the regulatory authority.

* Major violations requiring immediate correction and resulting in an unacceptable rating.

COMMENTS: This was an investigation of a paper dump site that is used by The Container Corp of America. The dump site is located just behind the Tony Parrett residence in Wabash, Indiana. Findings - No environmental problems were observed here at the dump site. Mr Parrett stated that it has been approx 1 year since the dump site has been used. The paper slag dumped here appears to be an untreated paper waste and the closest creek is approx 150 ft from the dump and this creek is diked. Mr Parrett stated that his spring water has been checked and was OK. (Pictures of the site were taken).
